A light blue outline map of the African continent serves as a background. A horizontal band across the middle of the map is divided into a grey section on the left and a blue section on the right, which aligns with the '2025' text below.

WELEDI AFRICA

2025

Bridging the gap between
education and industry.

There is a clear gap between the knowledge students gain in school and the practical skills needed in the workforce. As a result, many graduates face difficulty in securing meaningful employment or struggle to meet the demands of their jobs. This skills gap contributes to a cycle of unemployment and underemployment. Our solution aims to bridge this divide by providing students with the hands-on experience and relevant skills required to excel in their careers.
